1 New Features

1.1 Overview

Version 1.7 provides

- Display of arrival times (ETA) for all stops
- Trip updates.
- Stop overview with extended options
- Turkish is supported as a new language
- Bug fixes

1.2 Display of arrival times (ETA) for all stops

Telekom.de E

14:14

78 %

Tour: 3SINQ1EEL4

	76327 Pfinztal, Gewerbestraße 26	14:11
	00:00 - 23:59, 01:30	
	75173 Pforzheim, Am Stangenacker 5-7	16:19
	12:00 - 13:00, 00:05	
	PTV Group Karlsruhe	17:03
	06:00 - 21:00, 00:23	

In the stop list, the time-slot and service time for a stop is now displayed on the left side, the ETA on the right side

Green ETA indicates, that the arrival time lies in the expectations,

Red ETA indicates, that the arrival lies after the expected arrival time slot.
If there is no time slot, PTA, planned time of arrival is used.

1.3 Trip Updates

PTV Driver App is now listening for trip updates on the current trip. So when there is a trip update, the new trip is loaded and the driver is informed by short message. If the stop is deleted, the driver is driving to, he is informed and led back to the stop list, where he can select a new stop, he is driving to.

So current trips can be changed, without caring if the driver is already on the road, he will receive the changed trip and will be informed.

1.4 Stop information with extended options

Every time you start driving, you receive a stop information screen, before entering the driving screen.

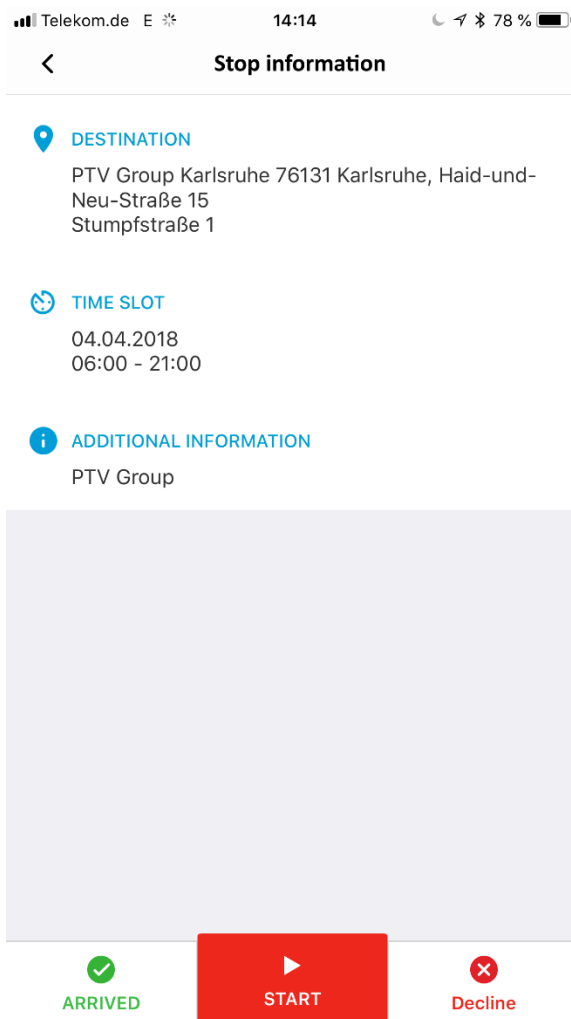

By using the new Arrived Button, you can mark a stop directly as arrived, you don't have to start driving to that stop any more.

Same happens, if you don't want to visit a stop, You can immediately decline to visit that stop without starting to drive to it

Start driving to the stop in the normal way, You will see the driving screen

1.5 Turkish is supported as a new language

We added Turkish as an additional language, you can select in the interface, as well, there have been some improvements to translations in general

1.6 Bugfixes

Main topics that have been fixed/improved are

- Sorting errors in recent trips
- Sometimes wrong sort order of stops on the stop list
- Language Changes in landscape driver screen
- No grayed stops any more on the stop list
- Wrong button in Summary screens of one stop trips
- Grayed out the title in search results
- Wrong title in the language menu
- Language change was not reflected in notifications
- Have you reached your destination with no, led to a canceled stop under iOS
- Not yet arrived did not return to stop list
- Info text is cut off under iOS
- Show approaching status, when re-driving to a location
- Receiving notifications of the last trip, not the current trip
- Trips have sometimes not on the recent list after driving
- Same tour in recent trips several times
- Crashes if trying to enter outdated trips
- Certificate problems
- Too many positions send in iOS Background mode
- Wrong stop states sent by the app
- The 12h format was not shown
- Bold tourname was not set correctly
- Visual glitches with the keyboard under iOS
- Raised minimum API level
- Vehicle configs are stored additionally local
- Mixed languages if os language and app language are different
- Wrong screen sequence when returning from settings
