1 New Features

1.1 Overview

Version 1.8 provides

- Improve Geocoding
- Popup for arriving trips
- Show SCEM-ID in Driver Screen.
- GDPR compliancy
- Australian Profiles
- Bug fixes

1.2 Improve Geocoding

With our improved geocoding, you can find also Points of interest.

Worldwide address search was improved, to find example targets more easily

1.3 Pop-up for Arriving trips

Trips, that are open via a link now are not stored any more in recent trips only, they also inform you actively that new trips has arrived, and what you'd like to do with it

Open it - to drive the defined trip

Save it - to store it in recent trips and use it later

Cancel it - to forget the information it

1.4 Pop-up for Arriving trips

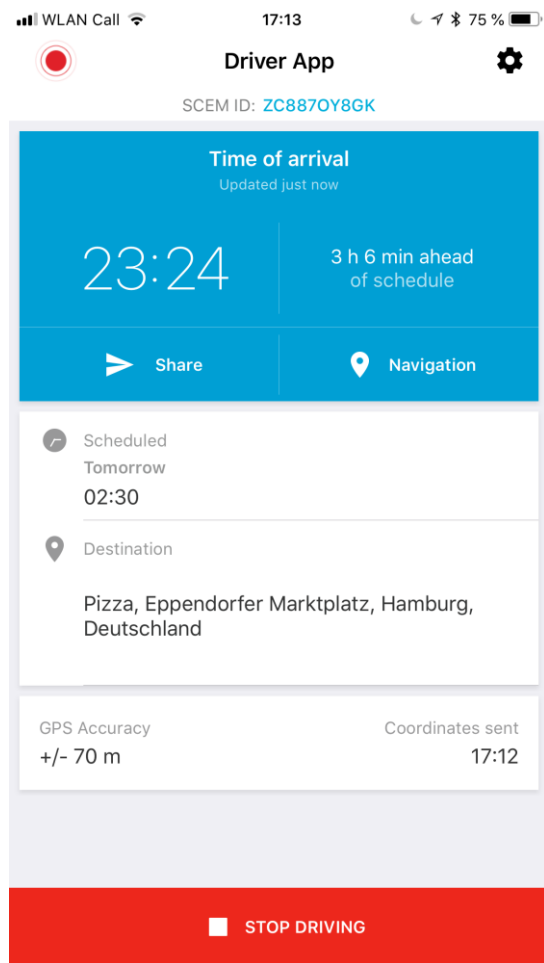

We support now Australian Profiles in the Driver App,

Please select Australia as a region to use them

These profiles are supported

- Car
- Van
- LCV - Light commercial vehicle 3.2t
- HGV 7.5t
- HR Heavy rigid 53t
- BDouble 57t using preferred routes

1.5 Show SCEM-ID in Driver Screen

The SCEM-ID is shown now at the top of the Driver Screen. This is the identification of a stop on our trip.

You can compare it with the ID of the stop shown in Map&Guide

1.6 GDPR compliancy

We reworked our Privacy Policy and the GTC to reflect the recent legal changes

1.7 Bugfixes

Main topics that have been fixed/improved are

- Cases in which Driver App stopped sending positions were corrected
- Trips are now always saved in recent trips
- Coordinate corrections when starting trips
- Crash on the duration of next stop screen
- Wrong button visualization on next break screen
- Saving duplicate instances of same stop
- Android notification on stop without PTA
- Trip not saved, when terminated by notification
- Obutacho send wrong position
- Scem ID not valid when continue driving

the mind of movement
