# 1 New Features

---

## 1.1 Overview

Version 1.9 provides

- Landscape mode is possible now
- Status "Arrived" also to be set outside 3 km
- Better handling of recent trips
- You can choose other navigation systems now in iOS
- You may define the date of PTAs
- Integrated Firebase support

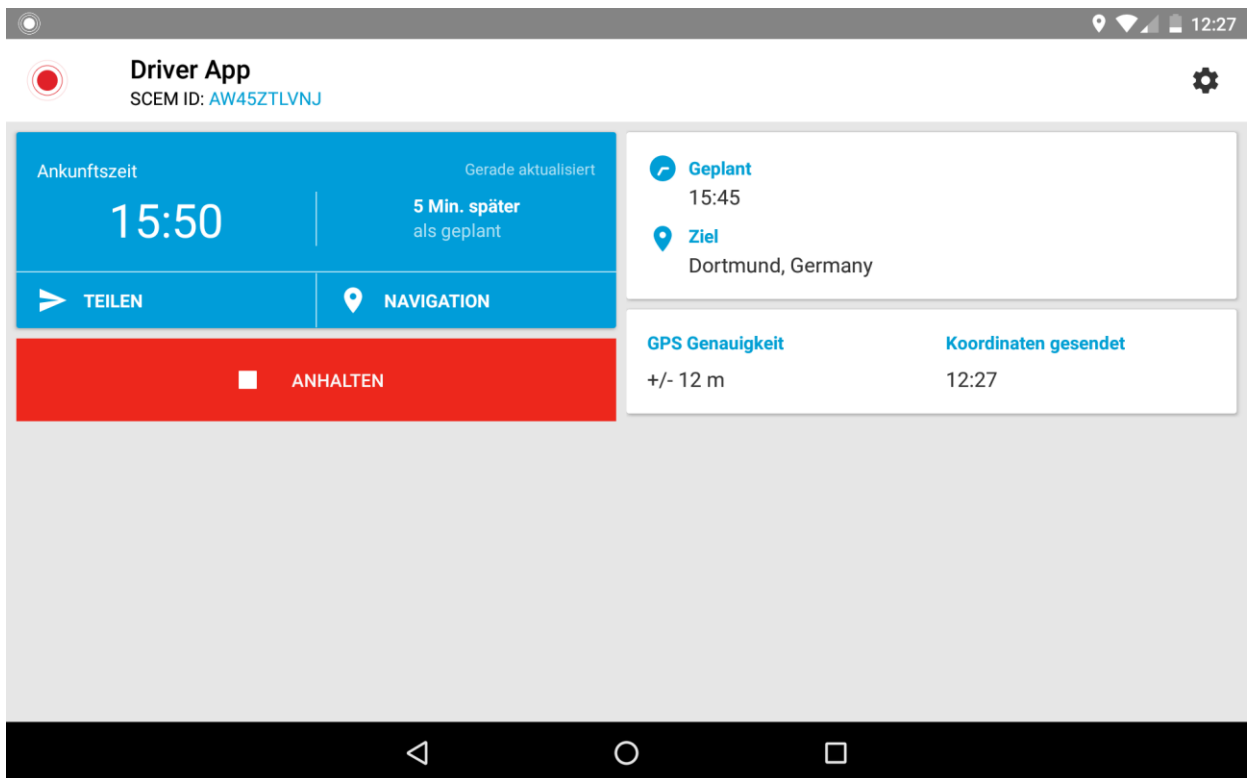

## 1.2 Landscape mode is possible now

Good news for anyone using a tablet, you can now use the Drive &Arrive app on your Tablet on Landscape Mode.

The behaviour under iOS and Android is different:

If you have an Android-tablet with screen size 7" or bigger it will be automatically detected and use landscape mode.

Under iOS you can switch to landscape mode by turning the device.

### 1.3 Status "Arrived" also to be set outside 3 km

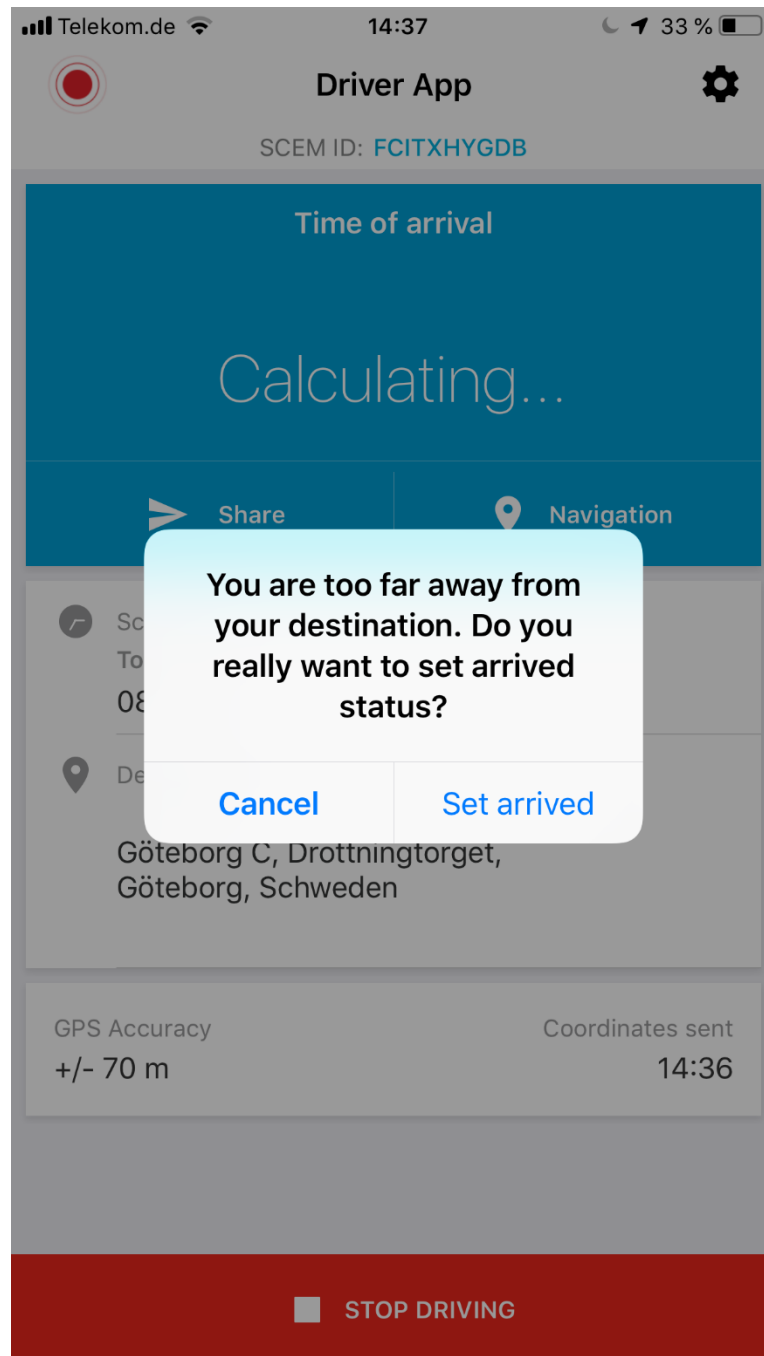

Status management is one of the virtues of the Drive&Arrive app.

While we had a restriction to press "Arrived" only in a 3 km range, to avoid that it is pressed accidentally, it turned out, that there are drivers, missing the right point in time for pressing "arrived".

So we decide to change the popup, to show a warning, but anyhow to allow setting the arrived status also outside a 3 km range round the target, as we want to give them the opportunity to also mark it also later as "Arrived"

Anyhow, if the driver changes the status of a stop, we record the distance to the mentioned stop

---

## 1.4 Better handling of recent trips

We display now the date and the time window of the first stop, so you can better identify your trips, if you have several recent trips.

### SAVED TRIPS

Göteborg C, Drottningtorget,  
Göteborg, Schweden

20.12.2018, 08:45 - 08:45

Göteborg C, Drottningtorget,  
Göteborg, Schweden

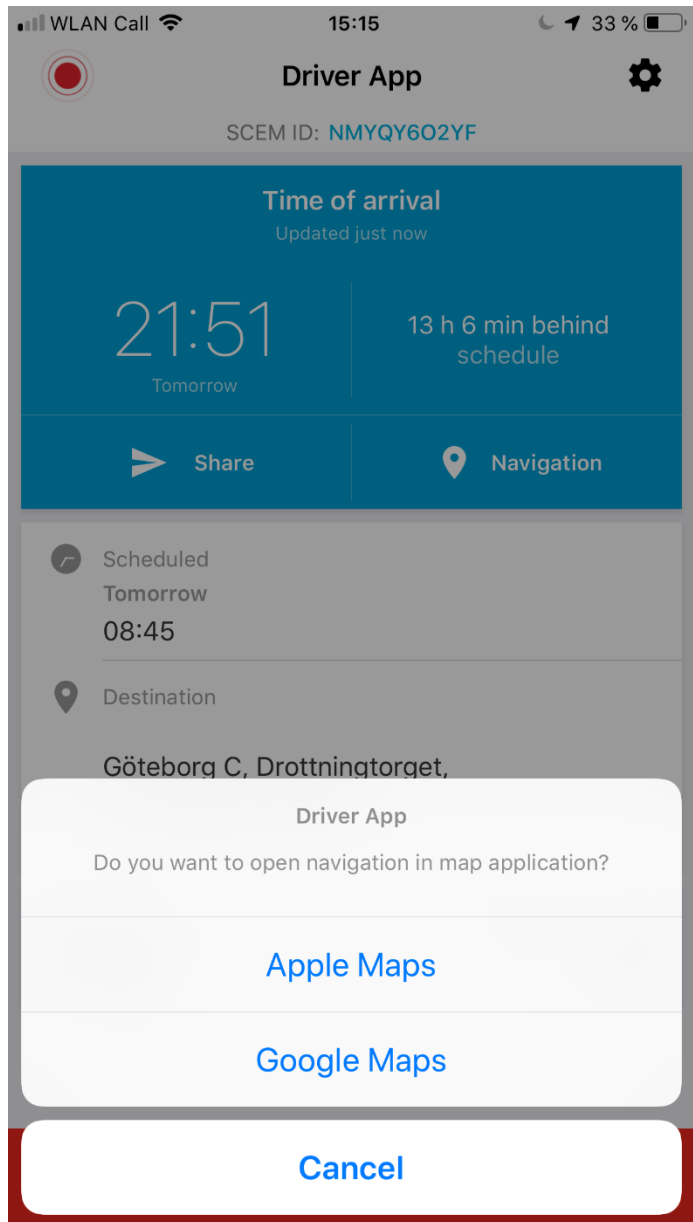

20.12.2018, 08:15 - 08:15

Also, there have been some situations, in which we forgot to save recent trips. This is corrected now

## 1.5 You can choose between navigation systems now in iOS

While Navigation possibilities under iOS were limited to Apple maps you can choose now, between Apple Maps and Google Maps for navigation

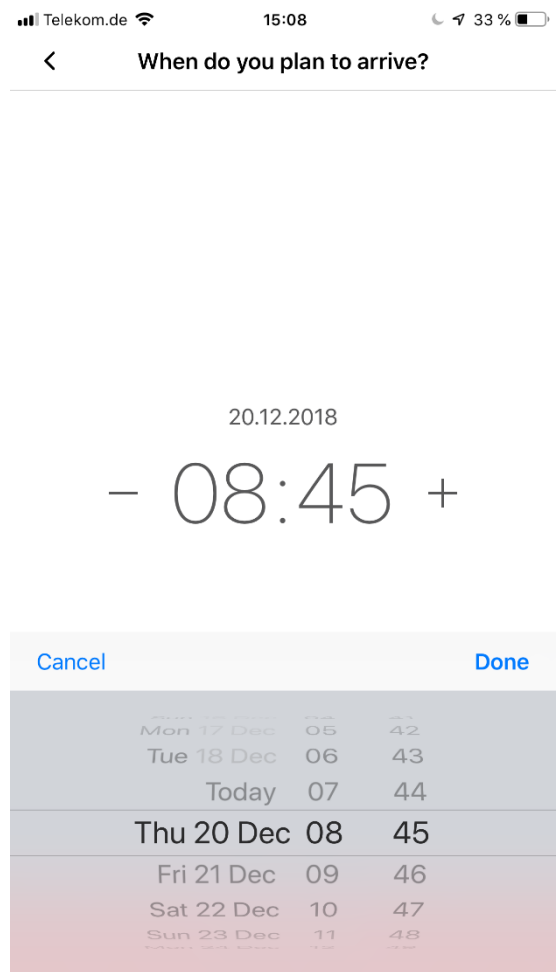

Under Android this feature was already available in the past, all installed navigation systems are offered there.

## 1.6 You may define the Date of the PTA now

If your PTA (Planned Time of Arrival) lied on the next day, it was not possible to define it now, by clicking ton the date, you can also change the Date of the PTA (under Android using a calendar popup)

## 1.7 Integrated Firebase support

To further improve usability we integrated Firebase support to analyze the app usage.

---

## 1.8 Bugfixes

Main topics that have been fixed/improved are

- Name of Australian trucks are correct now
- Flow corrections using "not yet arrived"
- Finished multi stop tour navigation handling
- Tour to arrival board with incorrect region
- Correction of translations
- Arrived notifications for single stop trips
- Time slots in saved trips

the mind of movement
