| Short title	Release Notes PTV Driver App
Version:	2.0
Author:	PTV AG
Release date:	Monday, 16th of May 2019

Contents

1 New Features

1.1 Overview

Version 2.0 provides

- Enter drive&rest periods updates
- Bugfixes

1.2 Enter Drive&Rest Periods Updates

Drive&Arrive recognized Breaks and Rests automatically and updates the ETA based on it.

Anyhow, there are situations, where Drive&Arrive needs additional information to calculate ETA correctly

- If you started the Driver app later then start driving

- If the GPS quality is not very good

- If you take rests where you have no GPS positions

- If the drive&rest periods information at the time the trip was created is outdated now

Click on the drive&rest periods button, to enter the drive&rest periods
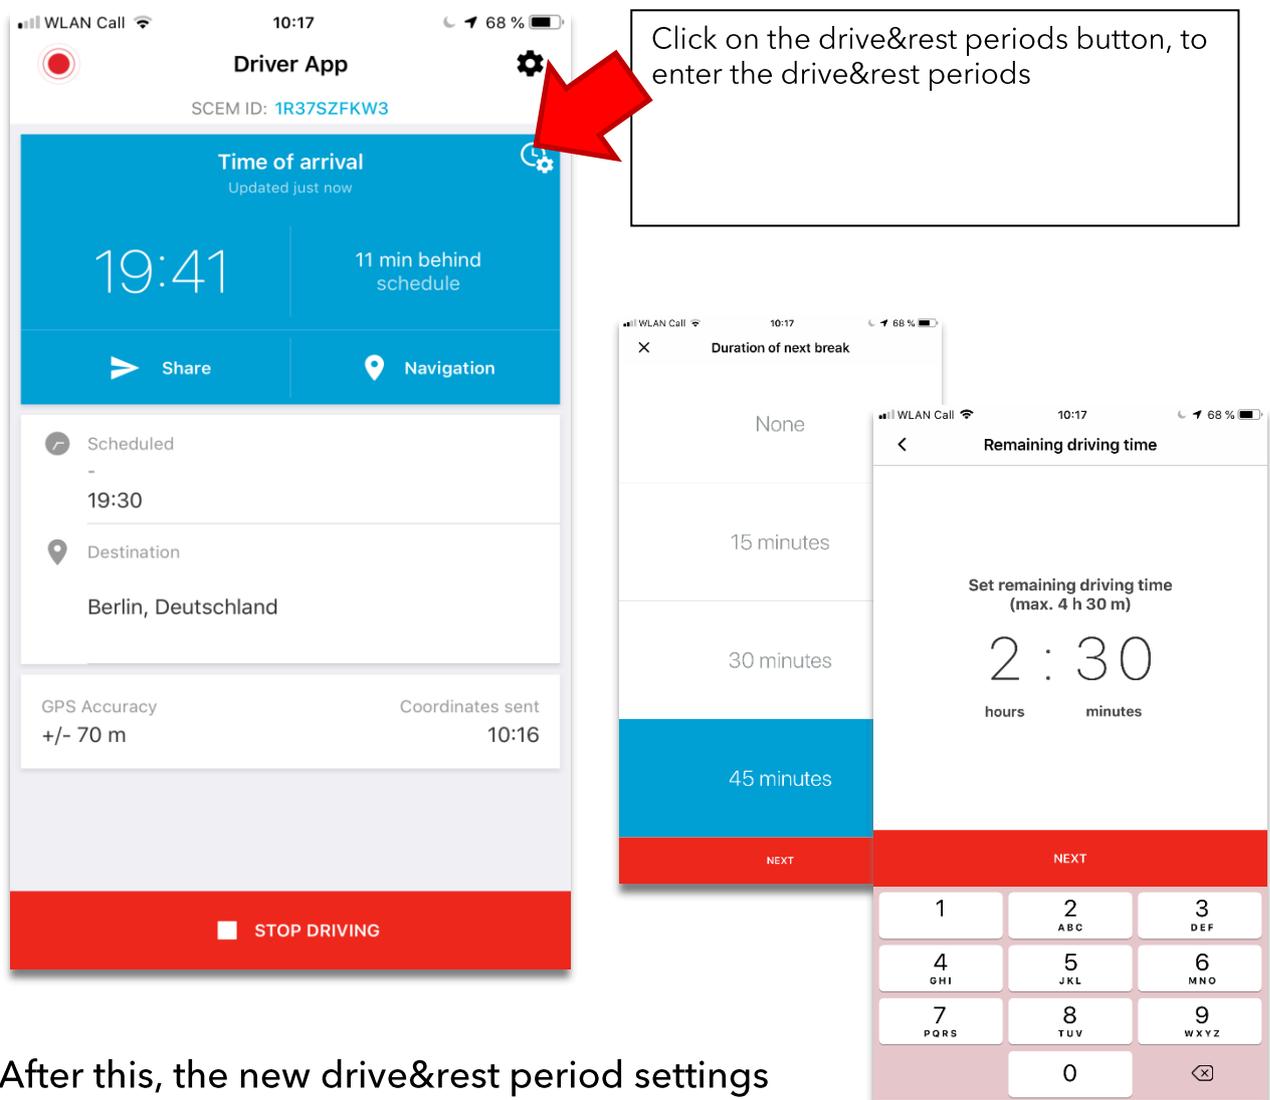

After this, the new drive&rest period settings will be used for following calculations

1.3   Bugfixes

Main topics that have been fixed/improved are

- Stable GPS sending if in Battery mode, or warning that you will lose positions, if not possible
- Tours link lost if turning tablet – error fixed, but anyway, please allow turning screen orientation, driver app on tablet can only operate in landscape
- Display of location names, when driving to an arrival board
- In some regions not all vehicles could be selected
- Language corrections in Russian, Roman, Magyar vehicle names
- Drive&rest period messages corrected after continuing paused trip
